# Who is Imperial Outdoors?

**N**elson Industries has been manufacturing custom ice fishing houses for over 10 years. Since the beginning, we've worked hard to provide the best quality product available, then work to make it better.

Imperial Outdoors was born from this cold-weather, enjoy nature to it's fullest, personality. We simply don't know how to do it any other way. We pay special attention to the functionality and usability of our product, not just the aesthetic. Our employees are outdoor enthusiasts and we field test our own products regularly to ensure we're providing the best user experience and quality possible. We are fortunate to have low employee turnover, which translates to knowledgeable, skilled employees that are passionate about what we do.

Taking our acquired knowledge over the past decade, we've created a product that ranks a step ahead of the competition. The Imperial XploreRV is NOT just another mass-produced "off grid" camper that looks pretty in a parking lot, but disappoints on the trail. We've taken the time to ensure all of our components are built to withstand the abuse of actually driving off-road as well. XploreRV boasts a rock-solid powder coated steel frame that uses a hydraulic system to adjust your ground clearance from 12" to 20" with the push of a button. If you find obstructions large enough, we made sure there are ZERO under body components below the frame to get tangled in debris or smashed on a rock. Skid plates protect the most sensitive components held within for additional peace-of-mind. Adding to the over-engineered toughness, our innovative construction and insulation methods provide comfort in temperatures down to -40°F. Lightweight, insulated acrylic windows also help to seal out the elements, while providing a spectacular view of your surroundings. XploreRV is a true 4-season, off-road camper designed specifically for those looking to take their RV on a remote outdoor adventure. It is our passion to provide not only the best product, but also the best user experience to match!

Check out our package options to customize your XploreRV to match your adventure. Our accessory racks, cold-weather components, and utility upgrades are sure to make your adventure more enjoyable. Imperial is built from the ground up with owner satisfaction and usability at the forefront of our mind.

*"We stand by our craftsmanship by offering industry standard warranties on all of our products. It is important to us that our customers are happy with their investment. We pride ourselves on our quality and customer service."*

IMPERIAL OUTDOORS

# What is XploreRV?

Conceived on a frozen lake in the Northern United States, you may find this beast roaming anywhere traditional RV's won't go. That same frozen lake, a muddy mountain road, hiding deep in the woods, you'll be hard pressed to find one at a roadside RV park. Built to exceed the boundaries of a traditional camper, XploreRV is your all-weather, all-terrain home away from everything!

## Why?... Because we can.

The off-grid camper has been gaining popularity in the US over the last few years, and we wanted to introduce a high quality, American Made unit that out-performs all others on the market. We've been building ice fishing houses that are used and abused over rugged ice roads and get drug over ice ridges and snowbanks to find the best fishing spots for over a decade. Then we thought, "why not ramp it up a bit and apply this concept to a true off-road camper?" Built using the exact same insulation methods we use on our Imperial Fish House, XploreRV will keep you comfortable down to -40°F. We beefed up the chassis and added improvements to make this unit a superior off-road, off-grid getaway vehicle.
